 devops.praveen.m@gmail.com

DevOps Engineer with experience in designing, implementing, and managing reliable CI/CD pipelines to support scalable and high-performance applications. Proficient in AWS Cloud, infrastructure automation (Terraform, Ansible), and container orchestration (Kubernetes, Docker).

PROFESSIONAL EXPERIENCE

Ace Assured

Cloud Support Engineer

Remote

January 2022–Present

- Set up and manage AWS cloud resources manually and by using Terraform for automation.
- Built and deployed Docker containers as needed for different projects.
- Created CI/CD pipelines in Jenkins and GitLab to automate building, testing, and deploying applications.
- Used Ansible playbooks to automate regular tasks, saving time and improving reliability.
- Added security checks for Docker images using Trivy and included these scans in CI/CD pipelines to catch vulnerabilities early.
- Managed Kubernetes pods to run containerized applications, making them more scalable and efficient.
- Modified existing Python and Bash scripts to monitor systems, analyze logs, and automate deployments for microservices.
- Used Git to manage and track changes in the source code.
- Worked with Linux systems like RHEL, CentOS, Ubuntu, and Amazon Linux to ensure they ran smoothly.

INAVAN INDIA TECHNOLOGIES

Linux Administrator

Kochi, Kerala

April 2018–February 2020

- Installed and configured Linux servers for various environments.
- Worked with services like Apache, MySQL, MariaDB, NFS, DNS, and FTP.
- Managed Logical Volume Management (LVM) with EXT4 and XFS file systems.
- Created virtual machines (VMs), performed cloning, and migrated VMs using Proxmox.
- Managed user accounts, groups, and file permissions to ensure secure access.
- Configured local and remote YUM servers and handled package management with RPM and YUM.
- Scheduled and managed cron jobs for automating server tasks.
- Monitored server performance, including disk space, operating system health, and user activities daily.

EXL Services

Senior Associate

Kochi, Kerala

June 2013–June 2017

- Worked in a non-technical profile.

EDUCATION

BHARATHIAR UNIVERSITY
Bachelor of Computer Applications

Coimbatore, Tamil Nadu
May 2012

PERSONAL PROJECTS

KUBERNETES CLUSTER

Designed and set up a Kubernetes cluster, deployed an application with auto-scaling, rolling updates, and self-healing features for high availability and performance.

TERRAFORM MODULE

Created AWS VPC with public and private subnets, along with required gateways and other resources, using Terraform modules to implement secure and scalable network architectures.

CI/CD PIPELINE

Implemented a CI/CD pipeline for application deployment using Docker, Kubernetes, Ansible, GitHub, and Jenkins to automate and streamline the deployment process.

APPLICATION DEPLOYMENT

Developed and deployed a sample e-commerce application with separate environments for development, staging, and production.

PERSONAL PROJECTS

Cloud Platforms (AWS): ACM, ALB, AMI, ASG, CLB, CloudFront, CloudWatch, EBS, EC2, EFS, IAM, KMS, NLB, RDS, Route 53, S3, Security Groups, SNS, VPC.

Configuration Management: Ansible.

Infrastructure as Code (IaC): Terraform.

Containerization & Orchestration: Docker, Kubernetes.

Source Code Management: Git, GitHub.

CI/CD Pipeline: GitLab, Jenkins.

Scripting: Bash, Python.

Monitoring: AWS CloudWatch, Grafana, Prometheus.
