Cloud Support Engineer

DevOps Engineer with experience in designing, implementing, and managing reliable CI/CD pipelines to support scalable and high-performance applications. Proficient in AWS Cloud, infrastructure automation(Terraform, Ansible), container orchestration (Kubernetes, Docker), and monitoring tools (Prometheus, Grafana).

WORK EXPERIENCE

The PRID | Innovative IT Solutions & Digital Experiences • 12/2021 - Present

Cloud Support Engineer

- Managing AWS Cloud Infrastructure deployment manually and using IaC as Terraform.
- Build and deployed Docker containers as per the requirement.
- Developed a robust CI/CD pipeline using Jenkins, automating the build, test, and deployment phases.
- Automated routine operational tasks using Ansible playbooks, resulting in a 90% reduction in deployment time and enhancing overall system reliability.
- Designed container security scanning using Trivy to identify vulnerabilities in Docker images. Integrated Trivy into CI/CD pipelines for automated vulnerability checks during the build process.
- Spearheaded the implementation and management of Kubernetes clusters for containerized applications, resulting in improved scalability and resource utilization.
- Implementation of Python/Bash scripts to automate deployment processes for microservices-based applications using Docker and Kubernetes, reducing deployment time by 50% and improving deployment consistency.
- Source code management using Git and GitHub.
- Linux Administration (RHEL, CentOS, Ubuntu, Amazon Linux etc) .

Inavan India Technologies Pvt Ltd. • Cochin, Kerala, India • 04/2018 - 02/2020

Linux System Administrator

- Installation and Configuration of Linux Servers.
- Worked with Apache, MySQL, MariaDB, NFS, DNS, and FTP Servers.
- Managing of LVM with EXT4 and XFS files systems.
- Creation of VMs, cloning and migrations of the VMs on PROXMOX.
- Managing user accounts, groups and file permissions.
- Configuring local and remote YUM server, package management using using with RPM and YUM.
- Responsible for setting cron jobs on the servers.
- Maintain and monitor servers' operating system and disk space and user activities on day to day basis.

Exl Services • Cochin, Kerala, India • 06/2013 - 06/2017

Senior Associate

- Worked in a Non-Technical process.

EDUCATION

Bachelor Of Computer Applications

Bharathiar University • Coimbatore, Tamil Nadu, India • 06/2009 - 03/2012

PROJECTS

Website Deployment

Deployed high availability WordPress setup using development, stage and production environment.

Terraform Module

VPC Public and private subnet creation using the terraform module.

CI/CD Pipeline

Application deployment using Docker and deployment using Ansible, GitHub and Jenkins.

Static Webpage

Setup S3 bucket and associated resources using Terraform to host a static website.

Kubernetes Cluster

Configured a Kubernetes cluster and Deployed a scalable and resilient application.

SKILLS

Configuration Management: Ansible

Cloud Platform [AWS]: ACM, ALB, AMI, ASG, CLB, CloudFront, CloudWatch, EBS, EC2, EFS, IAM, KMS, NLB, RDS, Route 53, S3, Security Groups, SNS, VPC

Infrastructure as Code [IaC]: Terraform

Containerization & Orchestration: Docker, Kubernetes

Source Code Management: Git, GitHub

CI/CD Pipeline: GitLab [Basics], Jenkins

Scripting: Bash, Python

Monitoring: AWS CloudWatch, Grafana, Prometheus, Zabbix
